According to Swedish Maritime Administration regulations (SJÖFS 2013:4) Port of Stockholm's ports are classed as public ports. In accordance with Swedish Law (1981:655) governing certain tariffs at public ports, Ports of Stockholm has the right to charge dues if quays, jetties or similar facilities within the port area that belong to the port owner have been called at or utilised.

Harbour dues, according to a fixed rate as set out in this price list, or according to special agreements, are payable for vessels calling at or leaving public port areas and for goods, passengers and vehicles accompanying these vessels.

For comprehensive details of terms and conditions please refer to Ports of Stockholm's Port Regulations and Ordinance information, which is available on www.portsofstockholm.com.

Invoicing of harbour dues according to this price list occurs after the vessel's application, which the vessel's master, ship owner or representative for any of these shall submit in accordance with Ports of Stockholm's Port Regulations and Ordinance instructions.

When the vessel is exempt from the obligation of submitting a vessel application, the vessel's master shall submit to Ports of Stockholm the data necessary to establish the amount of the harbour dues. Special regulations apply to vessels with permanently allocated berths. Information about the goods loaded or unloaded shall be submitted to Ports of Stockholm four (4) days at the latest after the completed loading or unloading. Ports of Stockholm is entitled to demand provision of any information necessary to satisfy the requirements of Swedish Authorities, or information necessary to establish the amount of harbour dues, or to satisfy other needs of Ports of Stockholm for information, such as to facilitate logistics planning.

Harbour dues charged according to GT (Gross Tonnage) are based on GT in accordance with Lloyd's Register (1969 measurement regulations), or alternatively the submitted Tonnage Certificate.

Harbour dues charged by the day are based on a time period beginning and ending 00.00-24.00, unless otherwise stated.

In the event that Swedish Authorities decree that special tariff provisions shall be levied for the vessels of specific nations or for specific types of vessels, these provisions will apply unreservedly.

Ports of Stockholm's port facilities are approved by the Swedish Transport Agency as compliant with maritime and port security legislation. This means that various types of security measures are implemented depending on the prevailing security threat level.

Ports of Stockholm may agree specific contracts with shipping companies/other companies using the port facilities regarding security measures for security threat level 1, and how such measures shall be financed. For elevated security threat levels, Ports of Stockholm may implement additional security fees, based on the actual costs incurred due to the elevated security protection measures. Shipping companies operating year-round scheduled services must agree a specific contract with Ports of Stockholm regarding maritime and port security.

Ports of Stockholm is a member of the Ports of Sweden organisation and implements Ports of Sweden General Conditions 1989 for terminal operations.

This price list is issued in Swedish with an English translation. In the event of inconsistencies between the Swedish and English versions, the Swedish version shall prevail.
